

31 March, 2025

PRESS RELEASE

On 20 March 2025, the Public Primary School in Łopiennik Nadrzeczny hosted an International Conference summarizing the Erasmus+ project "Green & Social StartUps". The event opened with a warm welcome from the school's director, followed by lively artistic performances from the pre-school and other students, with dances showcasing the rich cultural heritage of our partner countries. A local government representative also addressed the audience, emphasising community support for sustainable initiatives.

Later, all project participants presented the results of their respective work packages, highlighting the project's impact on green and social entrepreneurship. The contributions of the local school were presented by an English teacher, reinforcing the community's commitment to innovative education.

The conference concluded with a visit to a local trading company, where the owner shared insights into the company's history and discussed the important role of herbs in promoting health and herbal medicine.

Thank you to all invited guests and participants for making this event a memorable celebration of our shared vision for a sustainable future!
